

SANJEEV KUMAR JHA

 jha.sanjeev.k@gmail.com,  +91-9920820209

Linkedin: <https://www.linkedin.com/in/sanjeevkj/>

TRAINING CERTIFICATIONS AND RECOGNITIONS:

- Course in Data Engineering from FTS: Feb 2025
- Data Landscape of GenAI: 2024
- Generative AI Overview: 2024
- PMP certified: 2023
- **JMeter** Load Testing from VSkills: year 2022
- Certified **AEM Sites Business Practitioner** (validity till 2025)
- AWS Certified Cloud Practitioner: year 2021
- Onsite work experience at **Dassault Systems** Israel, year 2009.
- Oracle 10g certified
- **Team Challenge** award: timely completion of MSF 2010X release in year 2009.
- ISTQB Certified Tester Foundation Level: year 2008
- Diploma in Software Manual and Automated testing from SEED infotech Mumbai
- **Proficiency in java Technology** from Patkar institute Mumbai

Education – Bachelor of Engineering in Info. Tech.: 2006

PROFILE SUMMARY

- Pursuing M.Tech in Artificial Intelligence & Data Science from CDAC, Noida
- Software QA Lead/Project Manager with over 17 years of experience.
- Successfully managed working on different projects. Demonstrated comprehensive skills in Test Planning, **Effort Estimation**, Hiring, Coordinating Testing Activities, Training, Mentoring and Supporting the Team.
- Demonstrated abilities in Test Environment setup, Documentation, Writing Test Cases, Test Execution, **Defect Management**, and Production Support.
- Strong delivery management practices and customer-oriented focus bringing in delivery enabled growth.
- Meet customer expectations by supporting proven software quality practices, implementing practical and effective process improvement methods.
- Expertise in **strategic planning** with strong management, negotiation, communication and leadership skills to contribute to corporate goals.
- Good Experience and Exposure to **Agile** methodology and experience in managing Scrum based projects.
- Extensive experience in functional testing (Web, Windows, Mobile applications), responsive testing, Black Box testing, smoke testing, system testing, **database testing using SQL**, sanity testing, security testing, Load Testing using **JMeter**, and regression testing.
- Established **risk-based testing** and defect management processes for the testing team.
- Proficient in **API testing** using different tools, including POSTMAN, SOAPUI, Swagger. Identifying areas in the project where **Automation** can be done for more productivity.
- Experience in Eclipse IDE, PyCharm and VSCode to develop **Automation test scripts**. Experience in Programming Language- **Java** for developing **automation** scripts using **Selenium web driver**, **TestNG**, developing Automation scenarios in **Cucumber framework**. Experience in Load testing tools – **JMeter**, **Load Runner**
- Beginner level Experience in **ETL/DWH-BI Testing**, Informatica Cloud/Azure Data Factory – snowflake, PowerBI, Tableau, Query Surge ETL automation tool, Python, **pandas**, matplotlib.

Employment Details

Ginger Webs, Noida

QA Lead (Nov 23 - Aug 24)

Project: MADE EASY, NextIAS, MENIIT

Environment: JIRA, MySQL, Postman, Adobe XD, JMeter, Automation using Java – Selenium, WordPress, Lighthouse, MacOS, Mobile testing, AWS

Description: MADE EASY, Next IAS, MENIIT: Development and maintenance of e-learning portals for IAS, IIT JEE, GATE and NEET aspirants, featuring both web and mobile interfaces.

Roles & Responsibilities:

- Facilitated Agile ceremonies, including daily standups, sprint retrospectives, and other key meetings, to ensure efficient team collaboration and project progression.
- Conducted defect triage through regular meetings, including documenting, categorizing, and maintaining records.
- Supervised daily testing activities, addressed production support requests, and ensured timely delivery of testing reports.
- Led the recruitment process for QA candidates, provided strategic team guidance, and managed performance evaluations
- Developed JIRA dashboards and trackers for effective project tracking and updates.
- Conducted various testing types, including functional, responsive, mobile app (Android & iOS), database, JMeter load, and security testing.
- Ensured the quality and security of Secure Browser implementations across multiple platforms, including Windows and macOS (MacBook Air - Intel & M2, MacBook Pro - M2).

NLB Services - NTT DATA QA Manager (June 21 – March 22)	Projects: Honeywell Building Technologies (HBT) Environment: Adobe XD, CMS- Adobe Experience Manager (AEM 6.5), Postman, axe DevTools, JIRA -Xray, and eazyBI, Confluence, SFDC, APIGEE, Elastic Search, SAP HANA, MSM translation, Xenu's Link Sleuth, SharePoint
Description: Implementation of Account Management, Customer Support & Order Status modules, and multisite language translation on Honeywell's existing e-commerce sites (Built on Adobe AEM) like Honeywell Building Technologies (HBT)	
Major Responsibilities: • Create test plan, Lead/attend project meetings/ceremonies daily scrum, technical grooming, demos, & retrospectives, and coordinate with NFR, automation, APP Support team & Client counterparts. • Getting walkthrough of user stories and provide with (TCoE) Approval. • Coordinated and executed testing tasks like Test Case Design (Functional & API) through JIRA-Xray, API testing using Postman, testing AEM static pages, authorable components, usability/accessibility testing, broken link verification, language translation in MSM, cross-browser and device (Touch-UI) testing, • Collaborated with various teams to test API integration for Adobe AEM CMS, including SFDC, APIGEE, Informatica, Elastic Search, and SAP HANA. • Monitored and reported project progress using JIRA dashboards (with gadgets), JIRA-Xray, JIRA-eazyBI, SharePoint and Scrum of Scrum (SOS) updates. • Utilized CI/CD pipeline for UAT/Prod releases, integrating JIRA, Confluence, Bitbucket PR approvals, and ServiceNow. • Conducted defect triage through regular meetings, including documenting, categorizing, and maintaining records. • Performed JIRA release closure activities. • Conducted interviews, onboarded, trained, and mentored new hires.	
Tekno Point/Dept, Mumbai Project Manager (Aug 19 - May 21)	Projects: Gujarat Tourism, Edelweiss Tokio Life Insurance, Iffco-Tokio, CEAT, UltraTech Domain: Insurance, BFSI, Tourism, FMCG Environment: CMS: Adobe XD, Figma, Adobe Experience Manager (AEM 6.4, 6.5), Postman, Swagger, JIRA, AMS, AWS Cloud, SharePoint, HTML, CSS, JavaScript, Java, Proofhub
Overview: The project scope has Migration of existing website into adobe AEM website with new UI/UX and Analytics integration. In this Adobe solutions deployed are AEM & Analytics. It also involved various integrations like BI API, WebEngage, LMS & other APIs to be consumed by AEM. UI/UX design, HTML creation, AEM component creation, subsequent AEM page creation, and integration with various APIs hosted on different platforms. After authoring is done code is deployed on stage, beta, and prod environment using CI/CD pipeline. It had deployment model as AMS on AWS cloud and DevOps also managed by us. Involved 2 non-prod Environment Setups and one prod environment setup.	
Major Responsibilities: • Understand, analyzed & gathered project requirements and designed VBRD based on feasibility analysis, wireframes, design mockups (Adobe XD, Zeplin, etc.) & discussions. Utilized SharePoint to store and share all artifacts. • Developed and tracked project artifacts including project plan, RAID log, Product & sprint backlog, etc. • Collaborated with cross-functional Project teams, external teams, and clients for the development of HTML pages, AEM components, integration (WebEngage, etc.), content Authoring & Analytics integration. • Collaborated with external teams, including design, API, and SEO compliance, to resolve external dependencies, as well as internal DevOps and IT teams for deployment on AWS cloud. • Managed end-to-end project execution, scope, release schedules, RAID, change requests & defect management. • Conducted defect triage through regular meetings, including documenting, categorizing, and maintaining records. • Facilitated/Attended scrum events/ceremonies like sprint planning, daily scrum/standups, sprint demo/review & retrospective. • Prepared and presented weekly project progress report deck to the client's steering committee, Project status reporting, and secured client sign-off on delivered Adobe AEM pages.	
QA Lead (Nov 2018 - July 2019) Projects: Tata Capital, Bajaj Finserv (BFL), Beautiful Homes (Asian Paints) Environment: AEM 6.4, MongoDB, Postman, Hobbes.js framework, Selenium WebDriver/testing/maven/java, JMeter for Load/Stress/Endurance testing, Proofhub Development methodology: Hybrid, Flow based (Kanban)	
Major Responsibilities: • Led Quality Assurance & testing activities and managing a team of QA engineers, expanding from 2 to 9 members. • providing training, ensuring quality standards and best practices are followed, strengthened quality processes, metrics & tools. • Analyzing the project requirements and creating and reviewing the test suite. • Executing the test cases on AEM author/publish instances of QA/UAT environment. • Performing AEM Content authoring, sanity checks on the Production environment, testing types performed- Cross-browser, device (mobile, tablet), collaborating with Project Team and stakeholders to team task completion. • REST API Testing using Postman, Performed Automation using Selenium WebDriver and load testing using Apache JMeter. • Improved task assignment and tracking through Kanban board (Proofhub), JIRA, GITLAB.	
Venture Labour, Mumbai Sr.QA Exec. (Oct 2014 - July 2018)	Projects: Farms.com, Faberge Environment: CMS: - (DNN, NopCommerce, Magento, Drupal), Google webmaster, Google Analytics, Informatica, PowerBI, mobile and tablet devices, Figma, Page Speed Insight, GTmetrix

Description: Development and maintenance of website [Agriculture and ecommerce domain] i.e. Faberge, usfarmer, shop.usfarmer.com, farms.com and sub-sites, Riskmanagement, agriville, pigchamp, agcareers, careersinfood, betterfarming

Major Responsibilities:

- Analyzing the requirements, estimating the required testing effort, and creating a Test Strategy document.
- Assigned tasks to the team members and reviewed their Test Case Design and execution results.
- Tested the functionality, cross-browser compatibility, responsive design (iOS & Android), Mobile application (iOS & Android), SEO & Analytics, page speed, and security vulnerability assessment (ZAP, Burp Suite) of the products.
- Conducted SEO analysis of more than 20 websites and reported the findings and recommendations to the Client SEO lead and CTO every week.
- Logged, tracked, retested, and regressed defects, also prepared and presented Project status reports to stakeholders.
- Conducted RCA of production defects with preventive measures and updated in MIS every week.
- Interviewed QA candidates, and mentored them on quality processes & application functionalities.

WNS Global Services, Mumbai

Senior Program Analyst
(March 2012 - Aug 2014)

Domain: Business Process Management (BPM)

Customer: IBO, NYK, Ally Financial, Bausch & Lomb, Countrywide, Conway, Transamerica, GMAC, Ally Financial, UMG, IMG

Environment: OCR, Omnidocs, Omniflow, MSSQL 2012, Jboss, Jmeter, Selenium Automation

Project Description: Implementation of customized workflow solutions and changes using Omniflow Workflow and Omnidocs Document Management System (DMS) by Newgen Software which involves Optical character recognition (OCR) technologies for Accounts payable (AP) and Accounts receivable (AR) documents.

Major Responsibilities:

- Analyzing the business requirements document (BRD), developing a test strategy, and designing test cases.
- Performed functional testing, UI testing, database testing using MSSQL server client, and load testing using Apache JMeter.
- Reporting the test status results, logging and verifying the defects, and creating user manuals for the end-users.

3DPLM Software Solution Ltd
(Dassault), Mumbai

Engineer Industrialization
(August 2009 - March 2012)

Project Name: Microsoft Office Business Application (MSF OBA)

Domain: Product Lifecycle Management (PLM), eCommerce | **Team Size:** 7

Customers: Bell Helicopter, AIRBUS, Dassault Systems Renault, L&T, Fujitsu

Environment: RHEL, AIX, DB2, SQL Server, VMWare, ENOVIA MatrixOne, DSXR&D

Project Description: ENOVIA Collaboration for Microsoft (MSF) allows users to create and access ENOVIA data from the most popular Microsoft applications: Word, Excel, PowerPoint, Outlook, Windows Explorer, and Windows Desktop Search. This capability enables enterprise-level collaboration with product content being managed in ENOVIA rather than on users' PCs, organizations now are able to create, manage, and review product content more securely.

MSF can be installed on ENOVIA MatrixOne High-end server (For Big Business Groups) as well as SMB (For Small Business Groups). Both High-end server and SMB have a stack of centrals.

Minimum Installation stack for high-end server: Modeling Studio, Collaboration Server, BPS, IEF, MSF. Minimum Installation stack for SMB Server: CPW, VPM Central, IEF, MSF

Major Responsibilities:

- Analysed the Product Enhancement Specification (PES) and designed a test plan and test cases to verify them.
- Test environment setup with various combinations of OS (physical & VMware hosted – RHEL, AIX, Sun Solaris, windows), App Servers (Apache Tomcat, Oracle WebLogic, IBM WAS, JBoss), and DB (MSSQL, MYSQL, Oracle 11g, DB2) combinations.
- Executed test suite, reported and tracked defects, performed retest/regression test, and weekly status reporting.
- Participated in quality gate reviews and provided GO/NO GO recommendations based on the testing status.

❖ Travelled to **Dassault Systems Israel**, participated in sessions and workshops, and acquired valuable knowledge and skills that I could apply to my Projects. **Received the Team Challenge award for completing the MSF 2010X release on time.**

Project Name: 3dswym (Internal Project)

Project Description: The 3DSwYm Social Innovation platform allows any company to create its own online environment where employees, partners, suppliers, and consumers can interact and become active participants to bring new ideas to innovate. It enhances interaction throughout internal and external ecosystems, making any enterprise more agile, innovative, and humane. It contains a community website and an app store that enables the users to purchase online applications (i.e. PLM-on-the-cloud or PLM cloud computing).

Major Responsibilities:

- Test Scenario and test Cases development, to test mainly the global website functionalities.
- Defect logging and tracking, to send daily test status update mail to on-site QE manager.

Lionbridge Technologies, Mumbai

Testing Engineer
(June 2007 - July 2009)

Project Name: SuccessMaker Enterprise (SME)

Environment: Java, Sybase, Crystal Report, Jasper Reports | **Operating System:** Windows -2k, 2k3, XP, Vista, Mac –Intel, PPC, Novell 6.5

Team Size: 18 | **Domain:** E-Learning (EdTech) | **Client:** Pearson Technologies

Project Description: SuccessMaker Enterprise is an assessment cum grade management system. The SuccessMaker Enterprise is a web-based and standalone PC application that facilitates "anytime, anywhere" access to learning content and administration.

SuccessMaker Enterprise helps school administrators and teachers organize and administer student groups and manage the learning process of groups and individual students. It enables teachers to assign courses to students, assess their assignments, monitor their progress, customize their instruction, and generate reports on their performance. The teachers can also access and manage the curriculum resources.

Major Responsibilities:

- Understand SRS & Test Plans, estimated required effort, developed test scenarios/test cases, and determined test data.
- Modified and enhanced test cases, and Managed weekly build deployments (District, School, and Web) on various servers (Windows 2k3, 2k8, Novell, UNIX), including DVD content installation.
- Conducted LAN server, LAN workstation, web server, web client, and standalone-custom installations.
- Performed LAN server updates, LAN auto updates, web server updates, web client updates, and DVD content updates.
- Involved in Large Student Data Conversion for Client (Through Conversion Utility).
- Executed manual and automated file imports and site transfers.
- Managed license management and license usage testing.
- Conducted server file comparisons, client file comparisons, and database comparisons.
- Created database services for school and district installations.
- For District installation Databases creation, firing SQL Script in Sybase ASA 9 OEM (ISQL).
- Conducted installation testing, including database restore and recovery testing, and rolling upgrades testing.
- Performed various testing types, including installation, smoke, functional, integration, regression, ad-hoc, system, re-testing, sanity, cross-browser, cross-OS (Mac, Windows), and performance testing.
- Maintained version control of testing artifacts using Microsoft Visual Source Safe (VSS) and Subversion (SVN) tools.
- Delivered knowledge transition (K.T.) sessions to new team members.

Project Name: NovaNET (16.1-16.2)-Web-based Conversion | **Team Size:** 12

Project Description:

This is a project where all student courses are launched through the Learning Management System so that they are deployed through the Web anywhere, anytime. Student success status (i.e. Pass/Fail) is maintained by LMS and all internal features are taken care of.

Major Responsibilities:

- Writing Test Cases, Performing Smoke Tests, Regression Tests, Defect Logging, and tracking till closure after retest.

Tools/Skills:

- **Design Tools:** Zeplin, Figma (Used for Responsive testing)
- **Software Integration Testing** - API Integration/Interfaces Testing using different Protocols/tools as below:
 - POSTMAN | SOAPUI | Swagger
 - REST Assured API Automation Testing.
- **Load Testing:** Apache JMeter 5.0/5.4, Load Runner 12.55
- **Database Testing:** MSSQL 2008/2016/2017/2022, MS Access, MYSQL, Oracle 10g/11g, MongoDB, Sybase ASE 9, DB2
- **Software Automation Testing tools:** Selenium Web driver 4.0 using java
- **Programming Language:** Java used for Selenium, SQL, and Basic Linux commands, Python, gherkin
- **CI/CD DevOps tools:** JIRA, Git, Github, Bitbucket, Jenkins and ServiceNow
- **SEO & Analytics:** Google Webmaster, Google Analytics, Adobe Analytics, Oracle Bronto
- **Cloud testing: Amazon Web Services Testing** – S3 Storage testing. Elastic search testing
- **CMS Tools:** Adobe AEM, Magento, NopCommerce, PhpMyAdmin, DNN
- **ETL Testing:** Informatica Cloud, Azure Data Factory, Snowflake, Azure SQL | **BI Tools:** Tableau, Power BI
- **Defect tracking tools:** Quality Canter, JIRA, Bugnet, Mantis, DSx R&D Tool, Zoho, Incidence Tracking Tool
- **Test Management Tool** – JIRA, X-Ray, EzyBI, Confluence, ProofHub
- **Operating Systems:** Windows 2000, XP, Vista, 7, 8, 10, 11, MaOS, AIX, Sun Solaris, RHEL, Android, iOS
- **Web/App Server:** Apache Tomcat, Oracle WebLogic IBM WAS, JBoss
- **Devices:** Android and iOS Mobile devices, Android and iOS Tablet devices, MacBook air, MacBook pro, devices from Pcloudy
- **Other tools:** VMware 6.5 Client, Broken link verification tool (Xenu)
- **Communication/Collaboration tools:** MS Teams, Google Hangouts Meet, WebEx Meetings/Teams, Skype, Team Viewer, AnyDesk, Zoom, Slack, Zoho meeting, SharePoint
- **Methodologies:** Waterfall, Agile, Hybrid, Kanban

Courses:

- Course in Data Engineering from Future Tech Skills: **August 2024 to Feb 2025**
 - **Skills Learned:** SQL, Advanced SQL, informatica cloud, Snowflake, AWS, Azure, Python, pandas, matplotlib, Advanced Excel, PowerBI, Tableau
- "Proficiency in Java Technology" from Patkar institute of technology, Mumbai: 2014
- Oracle 10g backend course from SQL Star, Mumbai: 2011
- Diploma in Software testing from Seed Infotech, Mumbai: 2007
- CDAC qualified with 76 percentiles: 2006

Academics:

- Bachelor of Engineering in Information Technology – **First Class with distinction:** 2006
- HSC/SSC - **First Division**
